Third Party Library List

The SonnetLab toolbox for Matlab (from here on called SonnetLab) is delivered with a folder of extra Matlab scripts. These scripts are not necessary for the use of SonnetLab but many users will find them useful.

TouchstoneRead

TouchstoneRead reads Touchstone formatted files.

EXAMPLE :

```
[freq, data, Zo] = TouchstoneRead(DataFileName);
```

freq	-	1xF arrays
data	-	PxPxP matrix, P- number of ports, F- number of freq points
Zo	-	impedance used in normalization of data
DataCell	-	an cell array containing the PxP data sets as vectors

This function was originally written by Tudor Dima, last rev. 26.10.2008, tudima at zahoo dot com (change the z into y...)

Latest Revision made by Serhend Arvas and Bashir Souid at Sonnet Software Inc.

Contact

Your feedback is important to us. If you have any questions or comments about SonnetLab, please contact Sonnet Support by email at support@sonnetsoftware.com.

Please make sure you are using the most up to date version of SonnetLab before submitting a bug report. When submitting a bug report please include the Sonnet project file that generated the error (Sonnet project files have the extension .son). The more information that that we receive the faster it will be for us to resolve the issue and contact you back.
